

CARD MANAGEMENT SYSTEM AND METHOD THEREFOR

ABSTRACT

5 The invention is a method and system for on-line card
6 management, wherein the card is issued to a card user 39 by an issuing
7 organization 46. The card user 39 interfaces with a card management
8 organization 44 via the card user's own computer 40 through the
9 Internet system 38 to a computer system 42 within the management
10 organization 44. The computer system 42 includes a computer program
11 44 that processes the request concerning the card(s) and the card
12 issuer 46 is informed of the card user's 39 request via the Internet
13 system 38. The computer program thereafter informs the card user 39
14 that the card issuer 46 has been informed.
